

Do want to be certain that your investment will last? Of course you do! In order for the purchase of your high-quality imaging software to continue paying off in the future, we recommend that you take out a Service Package contract.

This is the easiest and most convenient way to make sure that your **dhs Image Data Base** will always be up to date. You can benefit from the continually ongoing feature enhancements and program optimisations carefully crafted by our team of experienced developers! All updates will automatically be sent to you on a DVD, with no need to order them and at no extra cost!

You can also call our toll-free service hotline for friendly, comprehensive, capable and immediate assistance with any problem you may have, or if you just need a tip on how to use the software. You can reach our support team during normal office hours with a free call to an 0800 telephone number (accessible from the German fixed line network). This is supplemented by the Internet-based, very easy-to-use desktop sharing software from our cooperation partner „pc visit“ (remote maintenance).

In order to give you access to information, advice and tips & tricks outside office hours as well, the dhs Service Package also includes a special password-protected area on our website, the so-called „dhslnet“. Online at www.dhssolution.com, you can obtain all sorts of basic information about dhs and our **dhs Image Data Base** around the clock, including additional help, FAQs and downloadable files.

But we have saved the best for last: **with each new dhs Image Data Base purchased, you receive the Service Package free for the first year!** Starting in the second year, the monthly costs amount to 1% of the list price of the software modules which you have under licence. **If you purchase a new Service Package, you are also entitled to a one-off user training day in our training centre, worth 350.– EUR, free of charge!**
