

Company Profile

In 1994, the system vendor dhs Dietermann & Heuser GmbH, founded in 1980, came up with the idea of putting self-developed digital imaging software on the market.

After intensive development work and the presentation of the first versions of the **dhs Image Data Base**, the new company **dhs Dietermann & Heuser Solution GmbH** was founded in 1996 and since then its strategic focus has been on this core product. The new company began with an initial staff of six, headed by Christian Dietermann as managing director.

The **dhs Image Data Base** very quickly developed into a product recognised in Germany and internationally in the so-called „imaging software“ sector. Over the years, the initially archiving-oriented program was expanded to include image acquisition, image processing, image analysis and documentation. Marketing is handled in close cooperation with numerous distribution partners which, as market leaders in their respective industries, draw on their core competences to open up very diverse application areas worldwide.

Today, we see ourselves as a complete service provider in the best sense of the term: dhs would like to be your competent partner for all imaging-related concerns.

For instance, we have expanded our portfolio to include hardware (cameras, microscopes, optical devices and PC systems), services (installation and consulting), custom programming and training.

www.dhssolution.com

As one of the longest-standing providers on the market, dhs serves you as a problem solver, consultant, software manufacturer, technological trend-setter, hardware supplier and contact partner combined, so you can count on us before, during and after introduction of the system. Our high levels of product stability and customer satisfaction could only be achieved through very close cooperation with the many thousands of users.

It is not a matter of chance that the **dhs Image Data Base** is considered one of the most easy-to-use imaging products in the world!

Day after day, our team of experienced developers and application specialists devotes all of its energy to the development and perfection of the entire portfolio and the optimal fulfilment of your requirements. Here, your wishes are the first priority: easy use, flexible and efficient work processes and integration into existing organisational structures are just as important to us as first-rate functionality and customisation options. At the same time, we always keep „both eyes on the market“.

So there is still a lot more to come from dhs – you can count on it!

Application Examples

Here are some examples of the industries and establishments in which our products are used:

- Aluminium Plants
- Automobile Manufacturers and Suppliers
- Government Authorities
- Vocational and Commercial Schools
- Breweries
- Chemicals Industry
- Service Laboratories
- Elastomer Production
- Electronics / Electrotechnology
- Universities of Applied Sciences
- Paint Manufacturers
- Foil Production
- Research & Development Institutions
- Beverage Manufacturers
- Drive Manufacturers
- Foundries
- Hardening Plants
- Semiconductor Manufacturers
- Clinics
- Cosmetics / Care Products
- Criminalistics
- Manufacturers of Ball Bearings and Roller Bearings
- Plastics Processors
- Circuit Board Production
- Life Science
- Aerospace Companies
- Mechanical Engineering
- Max Planck Institutes
- Medical Technology
- Measuring Devices
- Dairies
- Engine Manufacture
- Pharmaceutical Companies
- Sintered Metal Processors
- Production of Steel and Stainless Steel
- Telecommunication
- Deformation Technology
- Universities
- Materials Laboratories
- Tool Manufacturers
- Scientific Institutes

... and many more!
